

Concrete roof tiles

A new brand of concrete roof tiles

swissporTON redefines the roof, ushering in a new era for the premium clay and concrete tiles that have shaped the landscape of European homes for decades.

innovation

complexity

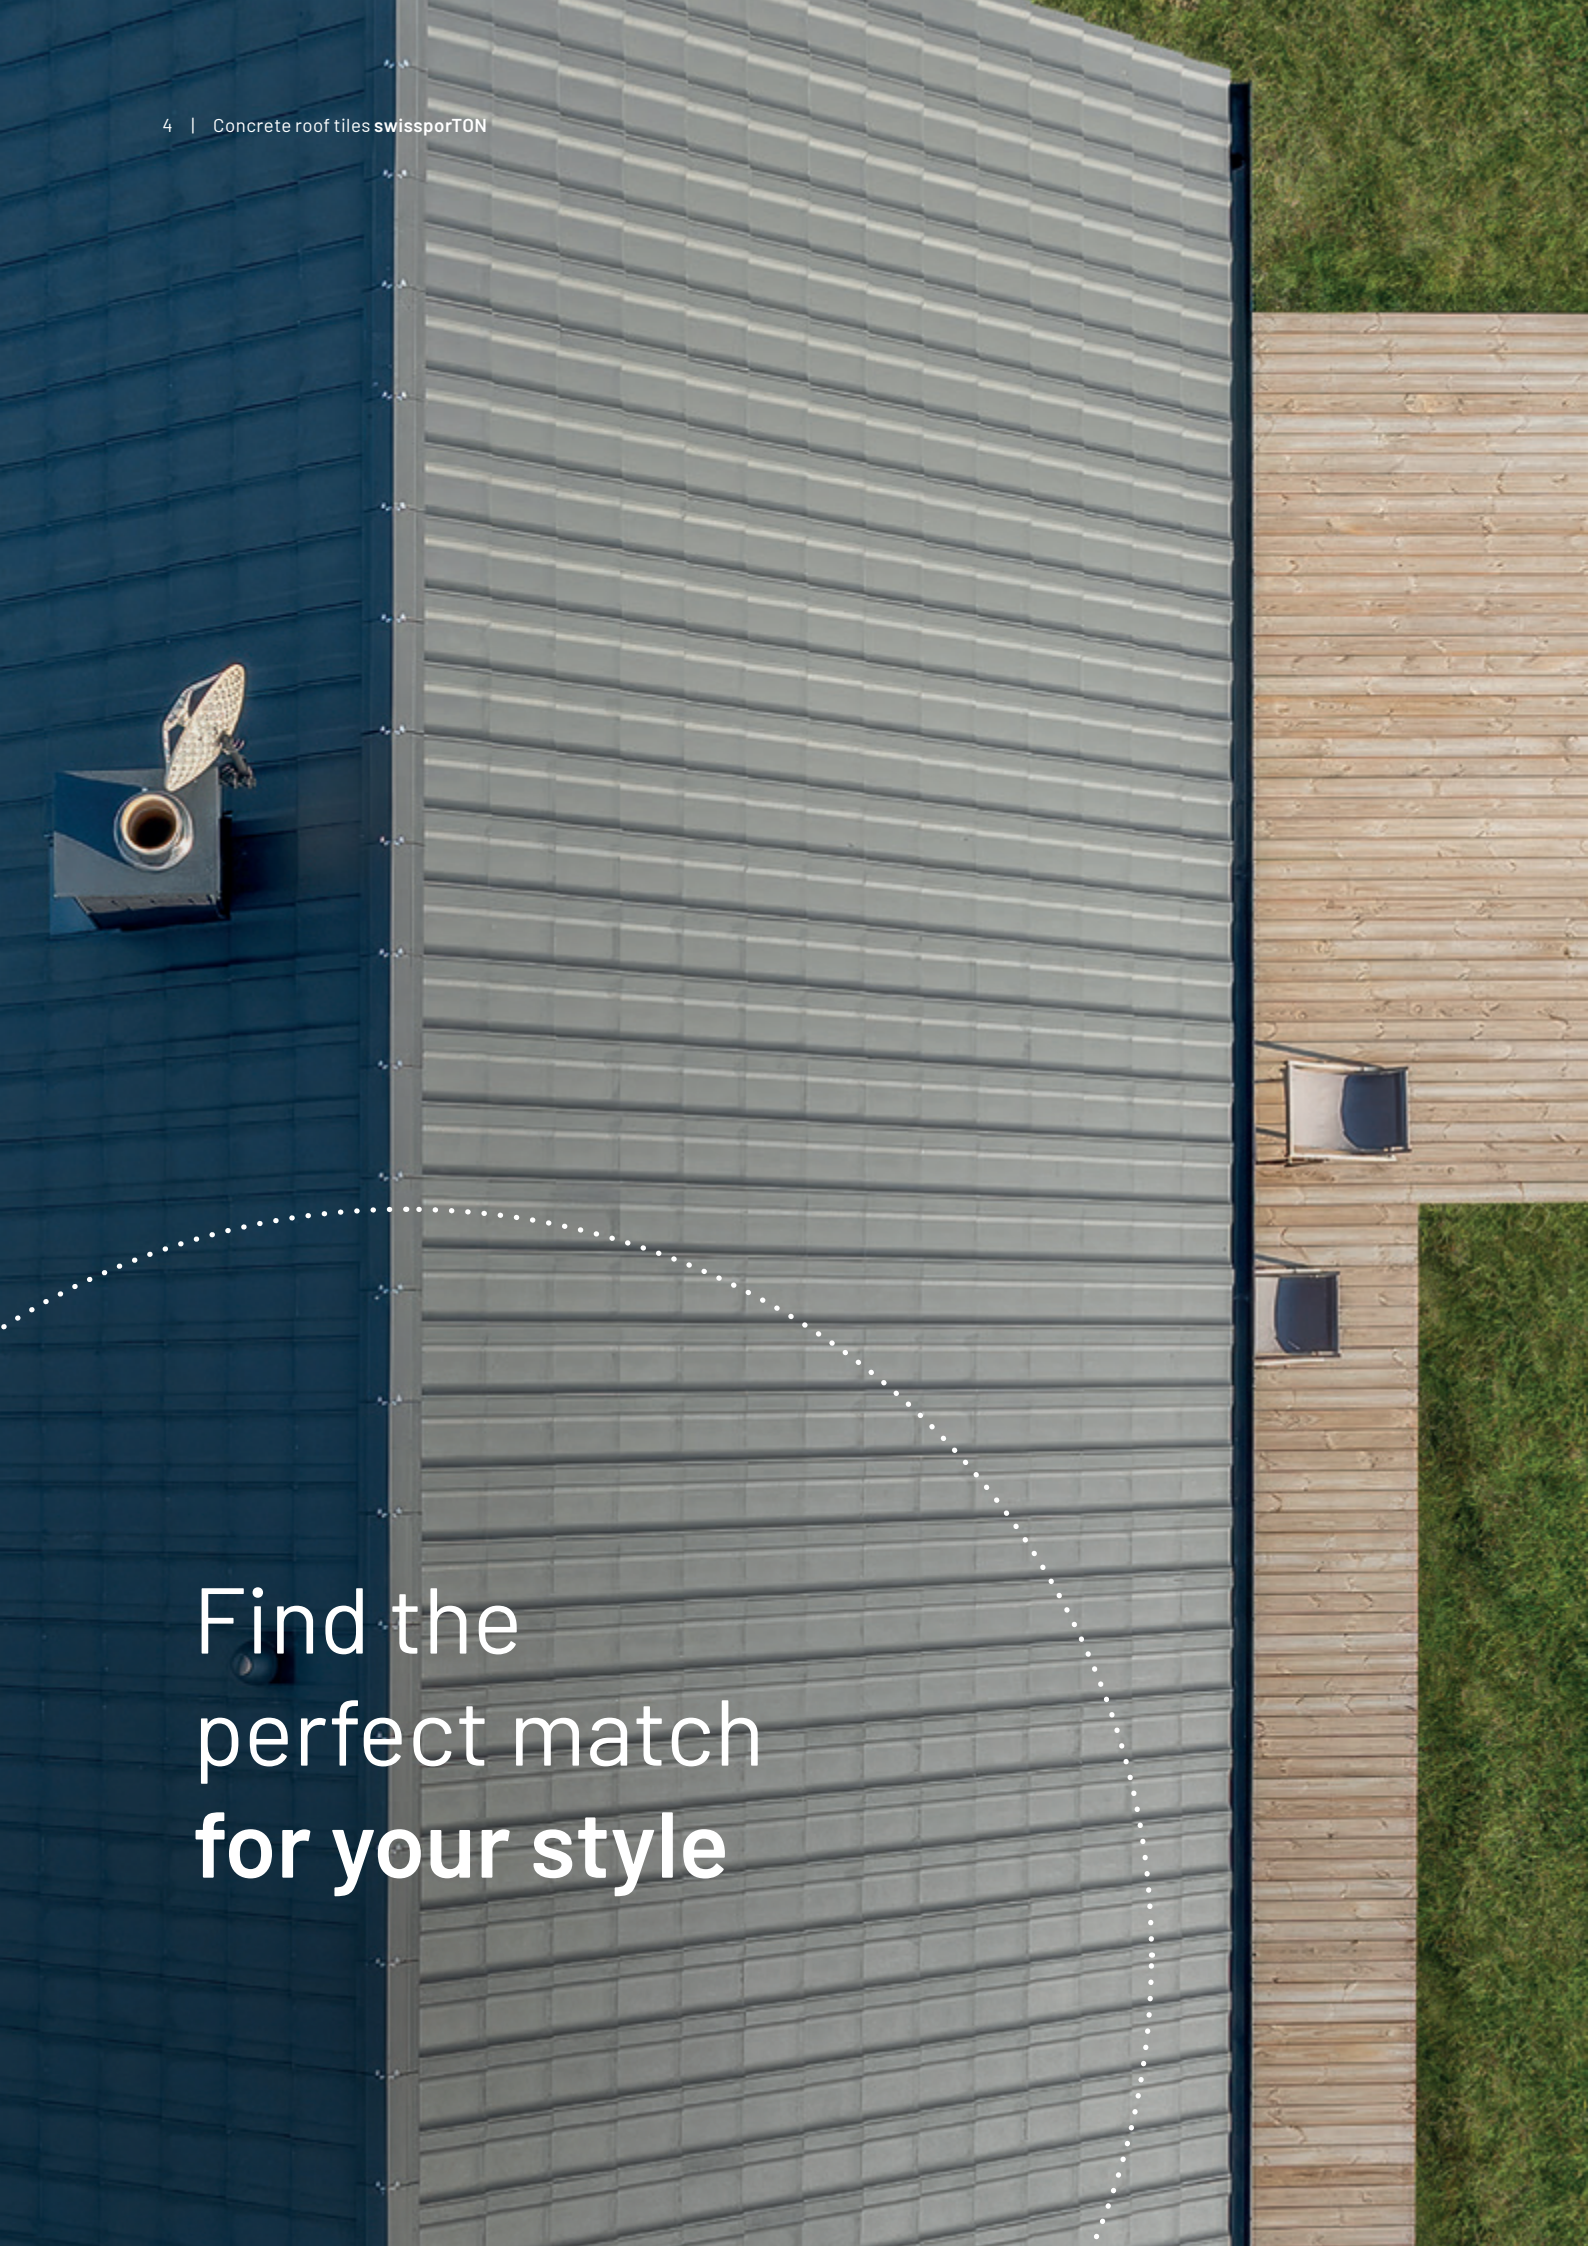

Today – with unwavering passion and meticulous attention to detail – our well-known models: **KAPSTADT**, **KIOTO**, **GÖTEBORG**, and **BREMA** are manufactured in state-of-the-art facilities under the wings of Swiss quality.

swissporTON is the promise of a roof that perfectly aligns with your dream home, regardless of style or individual expectations.

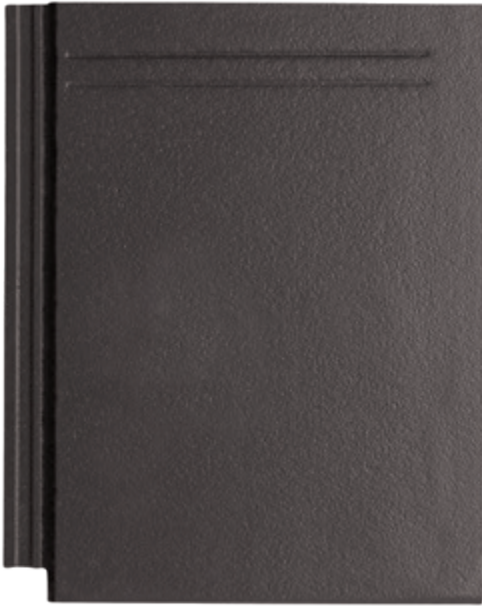

It is a new level of possibilities, enriched by the heritage of the **swisspor Group** – a leader in energy-efficient construction solutions.

By choosing **swissporTON**, you gain a roof that not only protects but also inspires, bringing beauty and innovation to the architectural space.

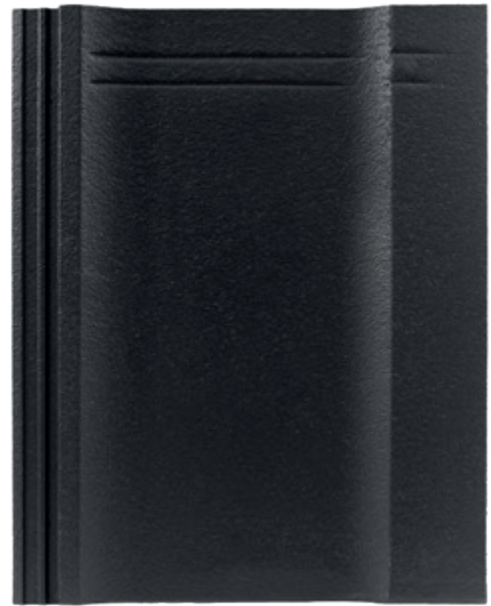

Find the
perfect match
for your style

KAPSTADT®

A modern, flat roof tile designed for simple forms and minimalist architecture.

8-13

KIOTO®

Its gentle wave and geometric harmony make it a perfect fit for roofs with an elegant, structured character.

14-17

GÖTEBORG®

A stylish S-tile with a modern twist – the perfect choice for traditional buildings with a touch of timeless elegance.

18-23

BREMA®

A dynamic profile and classic look – a roof tile that combines aesthetics with resistance to harsh weather conditions.

24-25

Unique advantages of concrete roof tiles

Durable and resilient, swissporTON concrete roof tiles are defined by their flawless aesthetics. Timeless shapes combined with an attractive color palette perfectly align with diverse architectural trends. Whether you choose a traditional model in a classic hue or a modern flat tile in a minimalist shade, you can rest assured that your roof will become the crowning jewel of your home.

A warranty for decades

With a warranty of up to 30 years and no need for regular maintenance, it significantly reduces long-term ownership costs.*

A sustainable choice

An eco-friendly, durable, and safe product – crafted for modern, responsible construction.

Fire safety

Made from non-combustible materials, the roof tile is completely fire-resistant.

Durability in challenging conditions

A roof tile engineered to withstand gales, hail, snow, and rain – providing long-term reliability for years to come.

Moisture resistance

Double interlocking grooves and water barriers effectively protect the roof structure from moisture buildup.

Structural stability

The weight and design of the tiles enhance the roof's resistance to high winds and fluctuating weather conditions.

Next-generation coatings

Discover the harmony of functionality and aesthetics with **Monolit** and **Duratop NOVA** – our next-generation coatings developed specifically for concrete roof tiles. Manufactured using state-of-the-art technology, they ensure excellent performance and durability, even in the most demanding weather conditions. They keep your roof looking pristine while adding depth and vibrancy to the tile colors.

The high-gloss finish Duratop NOVA

The Duratop NOVA gloss coating is the perfect solution for those who value both aesthetics and durability. Its superior smoothness and hydrophobic properties ensure that water beads off the tile surface, effectively preventing dirt buildup on your roof. Concrete roof tiles with the Duratop NOVA finish not only impress with their appearance but also offer easy maintenance and long-term weather protection. With Duratop NOVA, your roof will look stunning for years to come.

The matte finish Monolit

The Monolit matte coating smooths the tile surface and enhances its resistance to external factors. Furthermore, it prevents the accumulation of impurities such as dust, dirt, and moss, keeping the roof looking clean and aesthetically pleasing. Its intense colors and matte finish lend the roof a modern character, highlighting its architectural appeal. Monolit is the perfect combination of functionality, durability, and a stunning appearance, designed to meet even the most demanding expectations.

Duratop NOVA[®]

high-gloss
finish

Enhanced smoothness

Significantly reduced surface porosity minimizes dirt adhesion, maintaining the aesthetic appearance of the tiles for longer.

Intense color

High-quality pigments ensure deep, vibrant colors that give the roof an attractive and modern look.

Long-term protection

The specialized coating formula creates a barrier that shields the roof tiles from harsh weather conditions for many years to come.

Monolit[®]

matte
finish

Perfectly flat design

The geometric form creates a uniform surface, perfectly suited for minimalist projects.

Practical gable tiles

An economical and aesthetic finish for roof slopes laid with a staggered pattern.

A wide range of accessories

Ensuring an aesthetic and long-lasting finish for your roof, down to the smallest detail.

The perfect roof tile for a modern roof

The **KAPSTADT** roof tile stands out with its trendy, modern profile. Its perfectly flat form aligns seamlessly with current architectural trends. It ensures a tight roof covering without distinct dividing lines, creating a smooth and uniform surface. KAPSTADT is the ideal choice for those who value **minimalist design**. Thanks to advanced structural engineering, it is also exceptionally durable.

Equipped with a double side lock, water barriers, and refined edges, it effectively prevents water ingress, maintaining full

weather tightness even during strong winds or heavy snow. The application of **the Duratop NOVA coating** ensures that water beads off the surface, washing away dust and dirt, which helps to preserve the aesthetic appeal of the roof covering. Manufactured from natural raw materials with minimal energy consumption, KAPSTADT is an environmentally **friendly roofing solution**.

Dimensions 334 × 420 mm

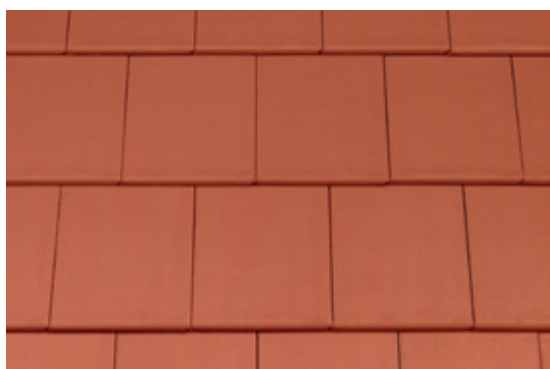

Coverage from 9,7 pc/m²

Weight approx. 4,9 kg/pc

KIOTO®

A concrete roof tile like no other

The **KIOTO** concrete tile is a **trendy alternative** to conventional flat roof tiles. Innovative in its design, crafted with passion and the utmost precision, **it impresses in every aspect.** It is a symbol of modernity, perfectly meeting the needs of contemporary architecture. Every detail of KIOTO is carefully considered - where **aesthetics meet functionality**, and minimalism weaves together with elegance.

Patented design

A unique shape that perfectly aligns with modern architectural trends.

Exceptional precision

High dimensional stability ensures perfect weather tightness and ease of installation.

A wide range of accessories

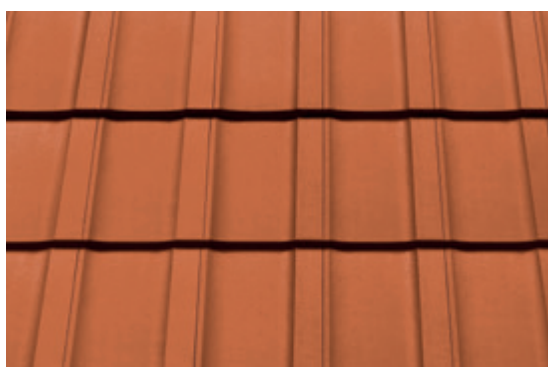

Ensuring an aesthetic and long-lasting finish for your roof, down to the smallest detail.

Dimensions 334 × 420 mm

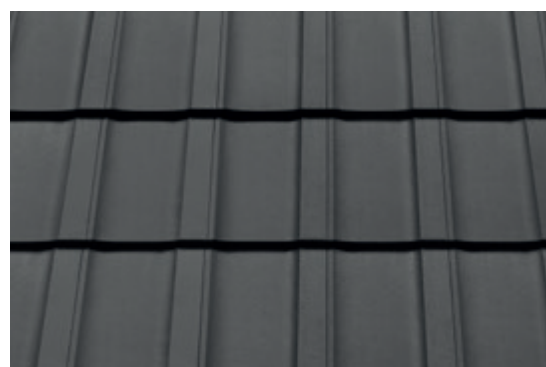

Coverage from 9,7 pc/m²

Weight approx. 5,2 kg/pc

Timeless profile

This design is the perfect choice for a roof that embodies enduring elegance.

Contoured overlaps

Provides additional roof protection against moss growth and sediment buildup.

A wide range of accessories

Ensuring an aesthetic and long-lasting finish for your roof, down to the smallest detail.

Timeless elegance

The **GÖTEBORG** concrete roof tile is both timeless and versatile, drawing its inspiration from the classic "S-tile" profile. It is the perfect fit for roofs with traditional architectural lines and **an ideal choice for those who appreciate enduring elegance**. Thanks to its advanced structural design, GÖTEBORG offers exceptional durability and resistance.

Furthermore, this tile is available in two surface finishes – the matte **Monolit** and the high-gloss **Duratop NOVA** – both of which

not only enhance the aesthetic appeal but also provide greater depth of color. With specialized side locks and deep overlaps, it effectively protects against moisture and water ingress. **The smooth edge facilitates installation**, while the ribbed underside ensures stability even under significant loads.

BREMA®

Classical harmony

The **BREMA** concrete roof tile draws its shape from the historic "monk-and-nun" tile, **a style known for centuries**. By leveraging advanced production technology, this historic form has been enhanced **with numerous structural solutions** that ensure excellent performance. BREMA is a roof tile whose immortal silhouette **highlights the timeless beauty of your roof**.

Historic silhouette

Inspired by the traditional monk-and-nun tile, it accentuates the timeless beauty of your roof.

swissporTON roofing system

The durability, aesthetics, and reliability of a roof depend on much more than just the roofing tiles. The completeness of the system plays a key role—a set of perfectly matched accessories that not only complement the tiles but also protect the entire structure while ensuring the building's comfort and safety.

The swissporTON accessory system for concrete roof tiles has been designed with both technical and visual consistency in mind. Every element – from ridge tiles and functional tiles to roof safety and snow protection systems – is engineered to integrate seamlessly with the roof tiles, matching them not only in color and texture but also in durability, weather resistance, and ease of installation.

Functional tiles

Functional elements such as ventilation, antenna, or verge tiles allow for an aesthetic and watertight finish of roof details while serving specific technical purposes. They are essential complements to the swissporTON field tiles.

Concrete ridge tiles

Concrete ridge tiles provide a durable and watertight finish for roof ridges and hips. When used with additional accessories, they protect against moisture penetration. They offer an aesthetic finish for the junctions of roof sections covered with swissporTON concrete tiles.

BLACK® membranes for roofs and facades

A range of models with varying technical parameters, combined with dedicated accessories, allows you to select a reliable underlay membrane perfectly matched to any roof featuring swissporTON roof tiles.

SunLACE® integrated photovoltaic system

Harmoniously integrated into the swissporTON roof architecture, it blends the traditional aesthetics of the roofing with the latest solar energy harvesting technology. It ensures an elegant appearance while providing maximum efficiency and reliability.

Roof communication

Roof communication systems allow for safe and stable movement across the roof surface during maintenance work. Thanks to their precise design, tailored specifically to our concrete roofing tiles, these elements can be easily installed on both new and existing roofs.

Snow protection

Protect gutters, terraces, entrances, and walkways from sudden snow and ice shedding. By minimizing the risk of damage and hazards, they ensure safety for building occupants. These durable components are designed for a perfect fit within the entire roofing system.

The swissporTON brand
harmoniously blends
classic aesthetics
with modern technology,
offering eco-friendly,
beautiful, and
durable solutions.
